Test Preparation Question

Answer the following question or respond to the statement. Remember to be as detailed as possible. You answer should reflect your understanding, be well written (this includes grammar, punctuation, and spelling), and be comprehensive. A well-written response is the key to doing well on the test!

TPQ4: List the six steps of the scientific method in order. Briefly describe each step in one sentence. Example: *Step One – The Problem: Scientists make an observation and ask a question.*
