

Unit 5 Handout
5 _____

Natural Evidence Reflection

Purpose: To discuss as a class what we observed during the fossils activity.

Key Points and Ideas

Questions for reflection

1. What can we learn about an animal by examining its footprints?

2. What do we need to know about an animal in order to determine how fast it moves?
(Ex: what would we measure from its footprints. Hint: think about the activities we did.)

3. In general, what do tree rings reveal to us?

4. What are some factors that affect how thick or thin tree rings are?
