

UNIT  
1LESSON  
1.5*Labeling***How to Label**

---

1. Only use straight lines.
2. Put as many labels on one side as possible. Use the other side if needed.
3. Never cross label lines.
4. Be sure the lines clearly point or touch what they label.
5. Always give your picture a title.

We will practice this by labeling the heart below. Here are the parts we need to label: right atrium, left atrium, right ventricle, left ventricle, aorta, superior vena cava, pulmonary artery, and the pulmonary vein,
