*Igneous Activities Exit Sheet*

**Grading:**

This is a **formal** grade. This means your answers need to be in full sentences using proper grammar. Your answers must be detailed and accurate.

**Resources:**

You may use your notes and activity sheet. You may discuss your answers with your group members.

**Question  
1**

In the first activity you had to determine if the granite had high silica (felsic) or low silica (mafic). Was the granite high in silica or low in silica? How do you know? (Hint: you can't use color to explain how you know!)

---

---

**Question  
2**

In the second activity you observed the formation of an igneous rock by watching sugar melt and cool. What was the origin of the "rock" that was made? How do you know?
