*Sedimentary Rock Exit Sheet*

**Grading:**

This will be **formally** graded. This means you will be graded on your scientific content, the detail in your answers, and any mechanics (spelling, sentence structure, etc.). Most students do not provide enough detail in their answer.

**Question 1**

Sedimentary rocks can form in two ways. One forms through a five step process. List the correct order of the five steps (you don't have to explain them).

---

---

Chemical sedimentary rocks form through a shorter, two-step process. Using full and complete sentences, briefly describe how chemical sedimentary rocks form.

---

---

---

---

**Question 2**

Sedimentary rocks are classified by the sediments they are made out of. Using full and complete sentences, state the three groups of sedimentary rock and what each is made of. Then, name an example of a rock in each group.
