*Lab Safety Homework*

Read each of the following statements. If the statement is true, write True at the end of the statement. If it is false, write False at the end of the statement.

1. You can wear open shoes or sandals during a lab. \_\_\_\_\_
2. It is important to read all directions for an experiment several times before beginning the activity. \_\_\_\_\_
3. You may bring all of your materials to your workspace during a lab. \_\_\_\_\_
4. You may perform a lab experiment without an adult if you have done that experiment before. \_\_\_\_\_
5. You should tie back all loose hair and remove or secure any loose clothing during a lab. \_\_\_\_\_
6. You must be familiar with the safety procedures should an accident occur. \_\_\_\_\_
7. Hold the back of your hand to a heated container. If it feels hot, it is too hot to handle without protective equipment. \_\_\_\_\_
8. You can mix two chemicals together if you are under the supervision of the teacher and have their permission. \_\_\_\_\_
9. When using sharp objects, always cut away from you. \_\_\_\_\_
10. You may only drink water during a lab. \_\_\_\_\_
11. You may drink from glassware if it has been thoroughly cleaned several times. \_\_\_\_\_
12. Always pour any unused chemicals down the sink with lots of running water. \_\_\_\_\_
13. Always wash your hands after all labs. \_\_\_\_\_
14. Never eat anything in a lab unless you are instructed to do so. \_\_\_\_\_
15. Never directly inhale a substance to determine its odor. \_\_\_\_\_
